EDUCATION

Lovely Professional University <i>Bachelor of Technology, Computer Science with Specialisation in DevOps</i>	August 2022 - August 2026 CGPA: 8.79/10
--	---

SKILLS

- **Programming Languages:** C++, Python, Bash
- **CS Fundamentals:** Object-Oriented Programming, Computer Networking, Operating Systems, DBMS
- **Databases:** MySQL
- **Cloud & DevOps:** Amazon Web Services (AWS), CI/CD Pipelines, Docker, Linux
- **Developer Tools & OS:** Git, GitHub, GitHub Actions, VS Code
- **Web Technologies:** HTML, CSS, JavaScript
- **Soft Skills:** Problem Solving, Communication, Team Collaboration, Leadership, Time Management, Active Listening, Debugging, Application Troubleshooting, Root Cause Analysis
- **Languages:** English, Hindi, German(A2)

EXPERIENCE

Razorpay Software Private Limited <i>Product Support Engineering Intern</i>	June 2025 –Present <i>Bengaluru, India</i>
---	--

- Performed distributed system debugging and led RCA for recurring incidents, reducing turnaround time by ~30%.
- Used MySQL for production data analysis and blast radius assessment, and built Python scripts for bulk data fixes, improving data integrity and reducing manual effort.
- Leveraged AI tools (Claude, Cursor, Slash) to accelerate debugging and automate workflows and closed over 1000+ tickets including many code and bug fixes.
- Supported fintech payment systems and merchant onboarding workflows, handling 20–40 JIRA tickets/week while exceeding SLA and CSAT targets; resolved ~880+ issues, including 300+ high-priority incidents.

Extion Infotech <i>DevOps Intern</i>	October 2024 – November 2024 <i>Remote</i>
--	--

- Supported DevOps team in basic infrastructure tasks, assisted in setting up deployment pipelines, and helped troubleshoot minor system issues. Gained practical experience in cloud technologies and collaborative software development processes.
- Assisted in automating deployment and testing workflows using CI/CD tools like GitHub Actions, improving development efficiency and reducing manual effort.

PROJECTS

AI-Powered Safety Assistant using Amazon Lex & AWS

- **Objective** – Developed a conversational AI-based safety assistant capable of responding to SOS and emergency-related situations through real-time multi-turn interactions and structured conversational workflows.
- **Learning Outcome** – Gained hands-on experience in building conversational AI systems using Amazon Lex, implementing intent recognition, slot filling, confirmation handling, and integrating backend fulfilment using AWS Lambda for real-time interaction workflows.
- **Tech Stack** – Amazon Lex, AWS Lambda, Conversational AI, Cloud Computing

BUILT A CI/CD PIPELINE USING GITHUB ACTIONS

- **Objective** – Developed a CI/CD pipeline using GitHub Actions to automate build and deployment workflows for a basic web application.
- **Learning Outcome** – Gained hands-on experience in continuous integration and deployment by configuring automated workflows, streamlining development processes, and understanding CI/CD practices in a real project environment.
- **Tech Stack** – GitHub Actions, HTML, CSS, JavaScript
